

## STRUCTURAL GRID NOTES - Level 2 Framing

Doc: STR-L2-GRID-01 | Metro Hub Expansion

### 1.0 Grid system

Primary grids A-H (east-west) and 1-8 (north-south). Corridor C2-East spans

Grid D-E between lines 4 and 5.

### 2.0 Beam schedule (excerpt)

BEAM-S-L2-W18x35-042: W18x35, Grid D-E / Line 4, Bottom of steel +3720 mm AFF,

Top of steel +4177 mm AFF.

Adjacent beams on Line 4.5 use W16x26 with BOS +3780 mm AFF.

### 3.0 Slab

Level 2 composite deck: top of slab +4500 mm AFF.

#### 4.0 Coordination notes

4.1 Structural owns primary steel framing geometry. MEP shall route around beams; beam depth changes require Structural approval.

4.2 Who owns coordination of Level 2 MEP: MEP Lead chairs the weekly BIM coordination meeting; Structural and Architectural attend for clash triage.

4.3 Openings larger than 200 mm in beams or decks require an engineered detail.

#### 5.0 Datum

Project base point and shared coordinates published in Trimble Connect folder /Coordinates/Shared\_2026. All discipline models shall use the same Level 2 datum.
